

Features:

1. User Accounts & Profiles

Users can create and manage accounts, update personal details, and control their activity across cases, pets, and notifications.

2. Smart Dashboard

A real-time overview of active cases, recent activity, match alerts, and key insights—helping users quickly understand what needs attention.

3. Lost & Found Reporting

Quickly report a lost or found pet with structured details like location, time, breed, and identifying features to maximize visibility and matching accuracy.

4. Pet Profiles

Maintain detailed profiles for pets, including photos, breed, age, color, and unique markings—making identification faster and more reliable.

5. Automatic Match Suggestions

The system continuously scans and suggests potential matches between lost and found reports based on similarity and location.

6. Case Tracking & Management

Track the full lifecycle of each case—from reporting to recovery—with the ability to update details, monitor status, and manage progress.

7. Case Linking & Match Confirmation

Connect related cases and confirm matches, allowing multiple reports to be associated and verified as part of the same recovery process.

8. Real-Time Notifications

Get instant alerts for potential matches, status updates, and important case activity so users never miss critical information.

9. Insights & Analytics

Visualize trends like recovery rates, high-risk areas, and case activity over time to better understand patterns and improve outcomes.

10. Location-Based Search & Matching

Find nearby cases using precise location data, enabling faster discovery and more accurate matching based on proximity.
